## **Resources for Individuals Living at Home**

**Purpose:** As a result of the COVID-19 pandemic, some families and friends may choose to care for their loved one at home who might otherwise have required care in a long-term care facility (e.g., nursing home or assisted living). For these individuals, the Indiana Division of Aging and local INconnect Alliance members may be able to help.

**Medicaid Waiver and Home Health Services:** To find out if you qualify for any of the services below contact your local Area Agency on Aging by visiting <a href="InconnectAlliance.org">InconnectAlliance.org</a>, or calling 1-800-713-9023 and typing in your ZIP code. Please note that all services are subject to availability and are not guaranteed. For more information about the Division of Aging, please visit <a href="incon/fssa/da/">incon/fssa/da/</a>.

The following are different home care services and supports that some families and friends may qualify for to help care of individuals in their homes:

**Attendant Care** can provide hands-on care to assist in activities such as bathing, dressing, eating, toileting, mobility, etc.

**Care Management** is a collaborative process to assess, facilitate, plan, advocate, coordinate care, and evaluate the person's needs with service or community resource options.

**Community Transition Service** can help pay for items that would be needed to allow someone to move out of a nursing facility and back home. This could include a bed, couch, initial deposits, clothes, personal care items, etc.

**Health Care Coordination** helps connect and coordinate both social and clinical services.

Home and Community Assistance can help with many daily tasks that do not require hands-on personal care such as cleaning, cooking, errands, help with paying bills, etc.

**Home Delivered Meals** can deliver nutritious meals to the home.

**Home Modifications** can provide accessibility updates to homes. This can include items such as ramps, bathroom remodels, and stair lifts.

**Personal Emergency Response** is technology that monitors for falls and notifies authorities if one occurs.

**Pest Control** can make sure the home environment is free from insect infestation.

**Prior Authorization Home Health** can provide needed skilled and unskilled home health needs through the prior authorization process.

**Respite** Care pays for a person to come into the home to provide temporary relief to family members caring for a loved one at home.

**Structured Family Caregiving** allows families to be paid for providing personal care services. The Area Agency on Aging may also provide training, education, and technology resources.

**Vehicle Modifications** can update a vehicle to be accessible to those with disabilities.
