

PROTECTED CODE BLUE

1

Alert Room

Remove all unnecessary individuals from bedside. (Code Team + First Responders)

2

Protected CPR

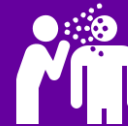

Place surgical facemask on patient, drape patient with bedsheet to cover face and chest and perform Compression-Only CPR

3

All code team members don PPE

Includes Gloves, Gown, N95, Eye Protection or Face-shield

4

Consider alternate airway management

Prefer LMA or i-Gel with filter as primary airway management. Intubate later.

5

Transport to ICU

Transport Team wears full PPE. Patient remains draped. Plan to intubate.
